Algorithm 1 Compute a sample mean

Require: Nonempty vector $x_1, \ldots, x_n$
Ensure: Sample mean $\bar{x}$
1: $s \leftarrow 0$
2: **for** $i \leftarrow 1$ to n **do**
3: $\quad s \leftarrow s + x_i$
4: **end for**
5: **return** s/n

Algorithm 1 uses one pass.
