1 First section

Theorem 1.1. *For a real x, $x^2 \geq 0$.*

Lemma 1.2. *For a real x, $x^2 + 1 > 0$.*

Exercise 1.1. Find the minimum of $x^2 + 1$ over the real numbers.

The shared sequence gives theorems 1.1 and 1.2; exercise 1.1 belongs to an independent exercise sequence.

2 Second section

Theorem 2.1. *For a real x, $(x - 1)^2 \geq 0$.*

Exercise 2.1. Find the minimum of $(x - 1)^2$.

Both counters reset in the new section: theorem 2.1 and exercise 2.1.
