Read a table before polishing it

Course reader

What must the reader be able to tell?

1. Which quantities each column contains.

What must the reader be able to tell?

1. Which quantities each column contains.
2. Which units the numbers use.

Reserve the space for this note so the layout stays steady.

What must the reader be able to tell?

1. Which quantities each column contains.
2. Which units the numbers use.
3. Whether notes explain any markers.

Reserve the space for this note so the layout stays steady.

Read the source literally

These numbers are invented teaching data.

```
\begin{tabular}{lr}
Task & Time (min) \\
Draft & 9.50 \\
Review & 12.25 \\
\end{tabular}
```

The ampersand separates cells. The double backslash ends a row.
