Contents

1 Question **1**

2 Method **1**

1 Question

How can a reader find an equation, a table, and the source of a command? The details are in section 2; the arithmetic is in equation (1). The LaTeX Project provides official documentation [1].

2 Method

Let t_1 and t_2 be the two task times in minutes. The symbol $\bar{t}$ denotes their arithmetic mean:

$$\bar{t} = \frac{t_1 + t_2}{2}. \tag{1}$$

The values in table 1 are invented teaching data. They demonstrate alignment and references. Equation (1) is on page 1. Return to section 1 or read the official documentation.

Table 1: Invented task times

Task	Time (min)
Draft	9.50
Review	12.25
